

CapSnap 600 BPH 5-Gallon Bottling Line 400V/50Hz

A complete, operational **CapSnap 5-gallon bottling line** with a production capacity of **600 bottles per hour**. Designed for high-volume water bottling operations, this line includes washing, filling, capping, decapping, conveying, dosing, coding, and robotic handling.

Key Features (System Capabilities & Benefits)

- **600 BPH high-speed production** for 5-gallon (19L) bottles **Fully automated workflow**: convey → decap → convey → wash → convey → fill → cap → convey → code → palletize
 - **CE version with NSF compliance**
 - **Stainless steel construction** for durability and hygiene
 - **Integrated sanitation dosing** for consistent wash quality
 - **Laser coding system** for permanent, maintenance-free date/lot marking
 - **Robotic handling** for improved efficiency and reduced labor
 - **Touchscreen Siemens PLC control** for easy operation
 - **System is functional and available for inspection**
-

Included Equipment / Major Components

- **CapSnap Portola Adapta 600 Series (2002)**
 - Bottle Washer
 - Bottle Filler
 - Bottle Capper
 - Bottle Decapper
- **Conveying & Handling (2002)**
 - CapSnap bottle conveyors
 - Southworth roller rack conveyor
 - Conveyor lubrication system
- **Coding (2017)**

- Videojet 3320 IP54 laser coder
- Videojet control unit
- Teka carbon filter system
- **Robotics & Lifting**
 - ABB IRB644 RM99 robot (2002)
 - Edmo Lift TL3000 scissor lift (2020)
- **Sanitation & Dosing (2002)**
 - EcoLab P3 CDI-01 soap dosing system

Condition

Functional, well-maintained, and ready for production.
